

OZF- LCD

Fire Alarm Indicating Panel

(Remote Annunciator)

Product Overview

OZF-LCD fire alarm indicating panel can be used together with the addressable fire alarm control panel, it can automatically receive the commands from the control panel and display the state of system (fire alarm or malfunction). With a wall mounting box, large LCD screen that can provide both Chinese and English language, specific and fine looking outline, the hardware uses micro-controller, modular structure designed software which can afford various alarm functions, so it is a high capability and high reliable fire alarm indicating panel.

Characteristics

- Built-in advanced micro-controller and intelligent software
- 2 bus lines current PWM digital transmission technology with great reliability
- Special methods for damp-proof, antisepsis and mildew-proof. Well prevented from high damp in seaside area.
- Large LCD screen with both Chinese and English language
- Easy installation and wiring

Specifications

Supply Voltage: DC24V (provided by the control panel)

Consumed Power: < 5W

Wiring: 4 wires, Two-wire bus, non-polarity; Two-wire power supply, DC24V.

Using environment: Temperature: $-10^{\circ}\text{C}\sim+50^{\circ}\text{C}$ Related Humidity: 95% ($40\pm 2^{\circ}\text{C}$)

Dimensions (L * W * H): 370×260×50mm Weight: 2.8Kg
